

# Webscraping I: Do-pair-share

Peter Ganong and Maggie Shi

January 28, 2026

## Do-pair-share

1. Inspect the HTML code on the Harris Specialization in Data Analytics page
2. What is the tag associated with the text that starts with: “Students in the Master of Science in Computational Analysis and Public Policy...”?
3. What are examples of other content associated with the same tag?
4. Look at attributes for tags with links. Some of them do not appear to be “full” links. Can you explain why?

## Do-pair-share solution

1. Inspect the HTML code on the Harris Specialization in Data Analytics page
2. What is the tag associated with the text: “Students in the Master of Science in Computational Analysis and Public Policy...”?

```
<strong>
```

## Do-pair-share solution

3. What are examples of other content associated with the same tag?

```
<strong>Still have questions?</strong>
```

4. Look at attributes for tags with links. Some of them do not appear to be “full” links. Can you explain why?

```
<a href "/admissions">Admissions</a>
```

This appears to be a *relative path*, whereas the *absolute path* is:  
`https://harris.uchicago.edu/admissions`
