

Kickoff - lecture 10

Peter Ganong and Maggie Shi

PS3 lab assessment debrief

- Codespace outage: Tue labs had Codespace turned off to level playing field across days
- Question 1: top 3 tickets to increase prices
 - A lot of students use “number of tickets paid” as the selection criterion for the 3 ticket types, but since we are raising prices by 10%, we should focus on the total revenue generated by each ticket type

PS3 lab assessment debrief

- Question 2: Visualization Proposal
 - Use `sort` for better comparison in bar plots
 - It's hard to compare values with `mark_circle`
- Question 3: Suggestions for visualization improvement
 - Good job!

Final project presentation updates

- Presentation slot assignments out, link [here](#) and on Canvas front page
- 10 minute presentation slots
 - One randomly-chosen presenter delivers entire presentation, so everyone on group has to show up
- Attendance expectation:
 - You come to your usual lecture sections
 - And the one you are assigned to present in
 - If these coincide, you only have to attend your usual lecture
